Summary

Experienced Full Stack Developer with a strong background in developing high-performance web and mobile applications over 7+ years. Proven track record in leading projects from initial concept to deployment, with expertise in automation, testing, and continuous delivery. Adept at enhancing system observability and user experience, utilizing tools like Firebase, Datadog, and OpenTelemetry.

Work Experience

Dailymealz

Riyadh, Saudi Arabia

Senior Software Engineer

Dec. 2021 - Present

- Led a team of 5 developers in implementing a background location check-in system for the driver app, improving route efficiency by 25%.
- Collaborated with cross-functional teams to ensure seamless integration of third-party tools, resulting in an enhanced user experience and reduced downtime.
- Built automated build pipeline on App Center for direct store deployment and internal testing, which reduce time to market by 80%.
- Increased system Observability by adding monitors on main flows using Datadog and OpenTelemetry stack, which contributed to decrease Mean Time To Resolve by 30%.
- Implemented a centralized module to track analytical events that make use of Observer Pattern and handle all integrated analytics events.

Nformacy.

Cairo, Egypt

Full-Stack Developer

Oct. 2020 - Dec. 2021

- Led development from business requirements to deployment, including backend and frontend.
- Designed and implemented automated BDD tests using Cypress, improving test coverage by more than 70%.
- Migrated existing web applications to support the SaaS model which enhanced the product to be more market fit.
- Implemented an internal calendar system for mentor availability and customer booking.
- Ensured interoperability with third-party applications (Zoom, ClickUp, calendar)
- Managed cloud infrastructure and deployment pipelines

DevSquads

Cairo, Egypt

Software Engineer

Aug. 2018 - Oct. 2020

- Worked in a self-organizing team to build high-quality software using Extreme Programming principles.
- Developed across multiple platforms: React Native for mobile, Ruby on Rails, Java Spring for backend, and React for frontend.
- Mentored teams in adopting Extreme Programming (XP) and Agile practices, resulting in a 30% increase in delivery efficiency and a significant reduction in technical debt.

Fikr Labs.

Cairo, Egypt

Software Engineer

Jan. 2018 - Aug. 2018

- Developed software using TDD with evolutionary design.
- Delivered thin vertical slice delivery on many projects across multiple stacks: Java, React Native, React.js.
- Maintained and refactored legacy code base using automated tests which provide a safety net and enhanced quality.

Skills

Backend Development

Node.js (Expert), Laravel (Proficient), Ruby on Rails (Competent), Java Spring (Competent), Socket IO

Frontend Development

React (Expert), React-Native (Expert), Redux (Proficient), Next.js, Tailwind CSS, Bootstrap

Database

MySQL (Proficient), Postgres (Proficient), Redis (Competent)

DevOps & Infrastructure

Docker (Proficient), Jenkins (Proficient), AWS, Azure, App Center, Circle CI,

Programming Languages

Javascript (Expert), PHP (Proficient), Ruby (Proficient), Java, Python, Go

Testing & Automation

Selenium, Cypress, Jest, Appium, Detox, Jmeter

Languages

English (Proficient), Arabic (Native), German (Beginner)

Education

Faculty of Science Cairo University

Cairo, Egypt

Bachelor of Science in Geophysics

Sep. 2012 - Jun. 2016

- Leveraged strong analytical skills from Geophysics to solve complex problems in software development.
